

5 Best Mobile Apps

For Clinical Research Associates

You probably have a plethora of apps already installed on your phone to try and make life easier, right? Maybe they're all grouped into category folders or they're grouped by screen view. You may even have a few of our suggestions below. And if not, be sure to load them now as they will make your life far more efficient as a Clinical Research Associate!

Directions

Google Maps and/or Wayze to help with directions if driving.

From Point A to Point B

UBER and/or Lyft if you plan to take a taxi to/from the site, hotel or airport.

Pharmacopoeia

This is a great app to help look up patient concomitant medications while monitoring.

Food

UBER Eats, GrubHub or DoorDash where you could order lunch and have it delivered so you can continue monitoring and not need to physically leave to get lunch.

Air Travel

Mobile app for the airline you are using for your travels so you can stay up to date on your travel itinerary and can plan accordingly for delays.

Making you more efficient in less time.™
